SAHIL PEDNEKAR

NaviMumbai, Maharastra | sahildeepakpednekar2002@gmail.com | +91 9082716947 | Linkedin | GitHub

PROFESSIONAL SUMMARY

Computer Science Engineering graduate specializing in Python, Django, Flask, REST APIs, SQL, PostgreSQL, MongoDB, and API Testing using Postman. Strong understanding of SDLC, STLC, software testing life cycle, test planning and execution, test cases and test scenarios, functional, regression, integration, system, smoke, sanity, exploratory, and UI testing. Familiar with positive and negative testing, Boundary Value Analysis, Equivalence Partitioning, test data, test conditions, expected vs. actual results, defect identification, and data validation. Experienced in backend development, database design, CRUD operations, API integration, HTTP/JSON, authentication concepts, and web application development. Familiar with HTML, CSS, JavaScript, Git/GitHub, and frontend-backend integration.

TECHNICAL SKILLS

Programming: Python, SQL, HTML, CSS

Database: PostgreSQL, MongoDB, Relational Database Design, Data Modeling, SQL Queries, Joins, Indexing, Constraints, Transactions.

Backend & APIs: Django, Flask, REST Framework, REST APIs, CRUD Operations, HTTP, JSON, API Integration, FastApi

Tools & Cloud: Git, GitHub, VS Code, Firebase, Render, Backblaze B2, Postman.

Frontend: HTML5, CSS3, JavaScript, Basic Responsive Web Development, Frontend-Backend Integration.

INTERNSHIP

IoT Intern | Sai Tronics *June 2020*

NaviMumbai, Maharastra, India

- Learned the working principles of **IoT devices, connectivity, and real-time data communication.**
- Worked on basic-level IoT hardware concepts and device interactions used in smart systems.

PROJECTS

Carzz – Android Car Rental Application | Ongoing Project | GitHub *Jan 2026*

An Android-based car rental platform that connects car owners with renters through an intuitive mobile application. Built with a testable, working prototype that demonstrates real-time vehicle availability and booking functionality

- Developed a fully functional Android application with user authentication, vehicle listing, and booking management features.
- Implemented real-time availability tracking and dynamic pricing based on vehicle type, location, and rental duration.
- Designed a user-friendly interface with features like vehicle filtering, search functionality, and booking confirmations.
- Currently working on integrating GPS tracking and in-app payment gateway for enhanced user experience.

Artify Pro – Artist & Instrument Management Platform | GitHub *Dec 2025 - Feb 2026*

Web platform for managing artist entry verification and instrument tracking during stage events.

- Built a role ID–based verification system where volunteers allow artist entry only if the artist has a scheduled performance on that date.
- Implemented a QR code–based lost and found feature that helps volunteers identify the owner of lost instruments by scanning the QR code attached to the instrument.

Database & Monitoring System – Enterprise Employee Management System | GitHub *Dec 2025 - Feb 2026*

Web-based employee management and database monitoring system built with a PostgreSQL backend for managing organizational data and operations.

- Built a role ID–based verification system where volunteers allow artist entry only if the artist has a scheduled performance on that date.
- Implemented a QR code–based lost and found feature that helps volunteers identify the owner of lost instruments by scanning the QR code attached to the instrument.

Emotions Detector | GitHub *May 2025*

Emotions Detector is an AI and Machine Learning-based project developed using Python that detects human facial expressions in real time through a webcam.

- Designed and implemented a **PostgreSQL relational database** for employees, departments, projects, attendance, payroll, and financial records.
- Developed CRUD operations for employee, department, project, attendance, and payroll management using **Python, Flask, and SQL**.
- Implemented database relationships, constraints, and structured data management to maintain **data integrity and consistency**.

CERTIFICATIONS & ACHIEVEMENTS

- **Deloitte Australia -** Cyber Job Simulation | Credential ID D9LSWAA7GfFniPwZ8
- **IoT Intern | Sai Tronics** – Micro-Controller, PCB Board Logic
- **Python Certification Course** – Python Programming, Data Structures, Functions & Object-Oriented Programming | Certificate ID: 1a0af523c508f16
- **PostgreSQL Certification Course** – PostgreSQL, SQL Queries & Database Management | Certificate ID: 39670df583eb378

EDUCATION

B.E in Computer Science in Artificial Intelligence & Machine Learning *2022 – 2025*

Saraswati College Of Engineering, Kharghar, NaviMumbai, Maharastra | CGPA: 6.09/10.0

Diploma in Computer Engineering *2018 - 2021*

Saraswati Institute of Technology, Kharghar, NaviMumbai, Maharastra | Percentage: 81.71
